

Build a Bridge -- Preschool Option

Build a colorful bridge with a Project Helper and six of your peers! Kids use bright and colorful pieces of candy to make a *sweet* bridge—pun intended! A simple step-by-step project plan takes small and simple steps and multiplies them through the power of TEAMWORK! Everyone participates, everyone contributes, and everyone has a hand in constructing an amazing bridge!

You will need:

- Toothpicks
- Boxes of Dots Candy

Bridge Building Tips

1. This project is fun for preschool students. Be sure to buy several extra boxes of Dots candy and allow students to eat a few pieces of candy. Announce to the students the number of "Dots" each student is allowed to eat prior to starting the project
2. This project uses the work of six different students. Consider assigning six students to a group prior to the start of the project.
3. Extra adult hands will help the assembly process. Be patient with students. There is plenty of time to complete this project in the allotted time.
4. At the end of the project, take pictures of each group with their completed bridge.
