

“Understand” Science Devotionals

Devotional #2 “Mentos/Diet Coke Devotion” – 20 minutes

“I Can’t Keep It In!” – A hilarious explosively science experiment helps to set the stage for understanding how the Apostles just could not stop telling the amazing story of Jesus! “I’ve been freed from sin, I can’t hold it in! I’ve got to share, all over, everywhere.” This memorable Science Devotion develops themes taken from Acts 4:19-20, “Which is right in God’s eyes: to listen to you, or to him? You be the judges! As for us, we cannot help speaking about what we have seen and heard.”

Each small group of 8-10 children will need:

- 2-Liter of Diet Coke
- 1 packet of Mentos Candy
- Soda Pop Geyser Contraption * (Item can be reused)

* = Indicates special item to be purchased

Tips for Success:

This is a very messy reaction. If you desire to preform inside, secure tarps to the ceiling and on the floor around the demonstration area.

Be sure to check the expiration date of the Diet Coke. The “Fizz” in aged or old pop becomes diminished over time.

Ready –

#1 – Getting Organized: To successfully organize your devotional materials, consider purchasing and gathering all the needed materials for the Science Devotional lessons and placing all 10 items into a plastic tub. Allow your small group leaders to check out a tub of the 10 science items, preview the contents, and become familiar with how each Science Devotional lesson works prior to the week of your program.

#2 – Science Devotional Items to Purchase – Each Science Devotional requires special items you’ll need to order.
