

"Trials" Science Devotionals

Devotional #2 " Bed of Nails Devotion– 20 minutes

"The Bed of Nails" – Kids and leaders get a first hand look (and touch) at an amazingly discrepant event that seems to defy conventional logic and reason. Using the scientific principles of surface area and pressure, this demonstration is a great way to show that an initial hypothesis is not always correct. This Science Devotion is a powerfully poignant reminder that in the abundance of trials, God's amazing power is shown strong.

Each small group of 8-10 children will need:

- * 1 Bed of Nails Set (Item is reused.) * = Indicates special item to be purchased
- Balloons
- Weights or items to place upon balloon

Tips for Success:
Consider practicing this demonstration prior to preforming it before students
Consider building your own Bed of Nails unit to save money

Ready –

#1 – Getting Organized: To successfully organize your devotional materials, consider purchasing and gathering all the needed materials for the Science Devotional lessons and placing all 10 items into a plastic tub. Allow your small group leaders to check out a tub of the 10 science items, preview the contents, and become familiar with how each Science Devotional lesson works prior to the week of your program.

#2 – Science Devotional Items to Purchase – Each Science Devotional requires special items you'll need to order.
