

Science Devotional Leader

Ready -

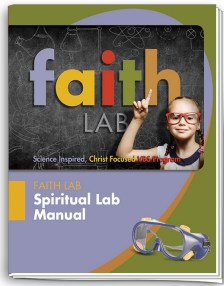

#1 – Getting Organized: To successfully organize your devotional materials, consider purchasing and gathering all the items needed for the Science Devotional lessons and placing all items into a plastic tub. Allow your small group leaders to check out a tub of the science items, preview the contents, and become familiar with how each Science Devotional lesson works prior to the week of your program.

#2 – Science Devotional Items to Purchase: Each Science Devotional requires special items you'll need to order.

The Almighty Can Crusher - Science Devotion - Almighty

Bringing You Up to Speed:

- Refer to the Spiritual Lab Manual for additional information.
- Watch the Science Devotional Closing Video “The Almighty Can Crusher” to see the experiment in action and learn how to set up your devotion room for small groups to move through your rotation.

You Will Need:

- 2-3 empty aluminum cans (or more)
- Small amount of water inside the can
- Blow torch or hot plate
- Metal tongs
- Matches or lighter
- Large bucket of ice water or a large beaker of ice water

Tips for Success:

- **SAFETY FIRST** - **Be cautious using any type of open flame or heat sources**
- Wait for steam to visibly rise from the mouth of the can before inverting into the ice water.
- PRACTICE this demonstration several times. Aluminum cans are cheap.
- Be sure to press the can down into the ice water, ensuring the mouth of the can is fully submerged.

Tips for Science Devotional Leader:

- It is possible to have a central location where one blow torch could be used by each small group. At this central location, you could have a large tub of ice water for groups to invert their heated can to observe it crush.
- Consider having enough cans for each small group’s leader to try their hand at crushing a can. Watching the can crush over and over NEVER gets old!
