Resource Table

This map shows the number of tables needed for each science station. The yellow dotted line indicates **ONE cart** shared by **TWO science stations**. It is best to arrange science stations that share a cart relatively close. Some stations need electricity.

Items to consider:

- (1) Rockets can be shot outside or down a hallway
- (2) Stations can be in a gym, classrooms, an atrium, or hallways
- (3) Rockets + Up, Up + Away carts have long extension cords built in
- (4) Science Stations = 26 eight foot tables
- (5) Resource Tables = 2 eight foot tables
- (6) **** The Resource Tables will move to atrium for after the show ****
